

ENVIRONMENTAL AUDIT

- ▶ Identifies your exposure to relevant environmental legislation or risks
- ▶ Includes recommendations to reduce costs and increase efficiency

As part of the audit you will receive a detailed site survey followed by a complete report detailing:

- environmental and human receptors in proximity to your site/s
- assessment of your main organisational inputs, processes and outputs
- a consideration of the significant environmental impacts
- implications of current/future environmental management system
- summary of strengths, weaknesses, opportunities and threats
- recommended action plan for the short, medium and long-term

“ Understanding your environmental risk exposure is key to reducing costs & improving efficiency ”

FREQUENTLY ASKED QUESTIONS:

Why do I need an environmental audit of my business/organisation?

The audit can identify resource efficiency improvements in any working environment and offer insight into relevant environmental risks; protecting you from existing/upcoming environmental legislation.

What does it cost and what do I get for my money?

Our services are bespoke and tailored to your needs so costs do vary depending upon your requirements. A detailed survey and report will be delivered as part of the audit.

Who else has done this sort of thing?

Historically manufacturers were required to have environmental site audits as part of their ISO 14001 obligations. Now however, all business sectors benefit from these audits.
